AI ANON

THE CHARTER

AI ANON is open source. Anyone can run a session, anywhere, in any format that works — as long as the spirit stays intact. The charter is that spirit, written down. It isn't a legal document. It's a handshake.

It's a community, not a product. Not a demo, a pitch, or a thought-leadership platform.

Small and safe. Sessions kept to around fifteen. Camera always optional. Anonymity always respected. You never have to share anything you don't want to — or speak at all.

Not for profit. Any fee covers genuine running costs only. No one profits from hosting. No community dressed up as a commercial offering.

The name belongs to the community. Use it to identify your session as part of the network — never to raise money, sell, or build a personal brand at the community's expense. "AI ANON [Place]" only. No sub-brands.

One host per place. First come. If someone's already running it there, join them — don't compete.

Share back. Learn something about running a good session? Give it to the network. AI ANON gets better when hosts learn from each other.

The data belongs to the room. Any list you build belongs to that community, never to another business.

Goodwill is the enforcement. This is a community, not a franchise. If the spirit breaks down — selling, excluding, harming, misleading — the network can ask a host to stop using the name. That's the whole mechanism. Trust, not litigation.
